# MCAEY

## General features

### FRAME

Self-supporting galvanized steel frame protected with polyester powder painting. Panels are easily removable for maintenance and service activities.

### COMPRESSORS

Hermetic «scroll» type with overload protection by a klixon and complete with oil sight glass. They are installed on vibrations absorbing rubber and placed within a closed compartment to reduce sound level and to allow service and maintenance activities while unit is in operation.

### EVAPORATOR

Brazewelded plate type. The circuit is made to guarantee an homogeneous cooling of all the water flow even during partial load. The insulation is made of flexible closed-cells lining. It is advisable to fit a differential pressure switch which will stop the unit in case there is no water circulation on the plate to plate evaporator.

### CONDENSER

Copper tube and aluminium finned coil. As option a protection grid is available.

### FANS

Axial fans with aerodynamic outline blade section made of Al/Mg, directly coupled to a single-phase electric motor with external rotor. A safety fan guard is fitted on air flow discharge.

### REFRIGERANT CIRCUIT

Each unit is supplied with: filter dryer, sight glass, thermostatic expansion valve, service valve.

To protect the refrigerant circuit the following devices are installed: manual reset high pressure switch and automatic reset low pressure switch, antifreeze thermostat.

The heat pump units version (MCAEY...H) contain, in addition: safety thermostat on compressor discharge line, 4-ways valve, check valve, solenoid valve, liquid receiver.

### ELECTRICAL BOARD

Weather proof type with protection grade IP54 installed in the compressor box to enable service and maintenance activities while unit is in operation.

It includes:

- Main circuit automatic breaker with locking door device, main fuses, compressor contactor, fans fuses and contactors, auxiliary circuits trafo. Microprocessor to control automatically the unit with a visual system to display the function as well as failures.

## Versions

### DS

Partial condensing heat recovery. It includes a desuperheater insulated and installed in series between the compressor and the condenser.

### RCS - RCP

On request.

### P

Hydraulic kit version. It includes: one pump, expansion vessel, safety valve, hydraulic circuit insulated and flowswitch. Relevant electrical circuit. As option, pumps with higher ESP are available.

### PAC

Version with hydraulic kit and storage tank. It includes, further to what included in the P version, a storage tank installed on the return line.

### LN

Low noise version, it includes: pressostatic fan speed control, compressor insulated with a high sound absorbing layer.

### VLN

On request.

## Options

- Fans speed regulator
- Remote control panel
- Programmer clock
- RS 485 card
- Evaporator electric heater
- Evaporator electric heater for PAC version
- Compressor suction and liquid line shut-off valves
- Gauges with shut-off valves
- Cu/Cu condensing coils
- Differential pressure switch (standard mounted on P and PAC versions)
- Pump shut off valve
- Water pumps with higher ESP
- Protection grid/filter condenser (protection grid only in H-units)
- Rubber AV mounts
- Spring AV mounts
- Wooden crate packing

**Notes:**

Tw - Outlet water temperature evaporator (delta T 5 °C)

kWf - Cooling capacity

kWa - Abs. power

## Refrigerant Circuit MCAEY

- 1 = Compressor
- 2 = Condenser
- 3 = Evaporator
- 4 = Fan
- 5 = Expansion valve
- 6 = Dryer
- 7 = Fan speed rec \*\*
- 8 = Suction line valve \*\*
- 9 = Liquid line cock \*\*
- 10 = Sight glass
- 11 = Schrader service valve
- 12 = Low pressure switch
- 13 = High pressure switch
- 14 = Gauge \*\*
- 15 = Temperature probe
- 16 = Antifreeze probe
- 17 = Supply cock \*\*
- 18 = Relief valve

\*\* The outlined components are optionals

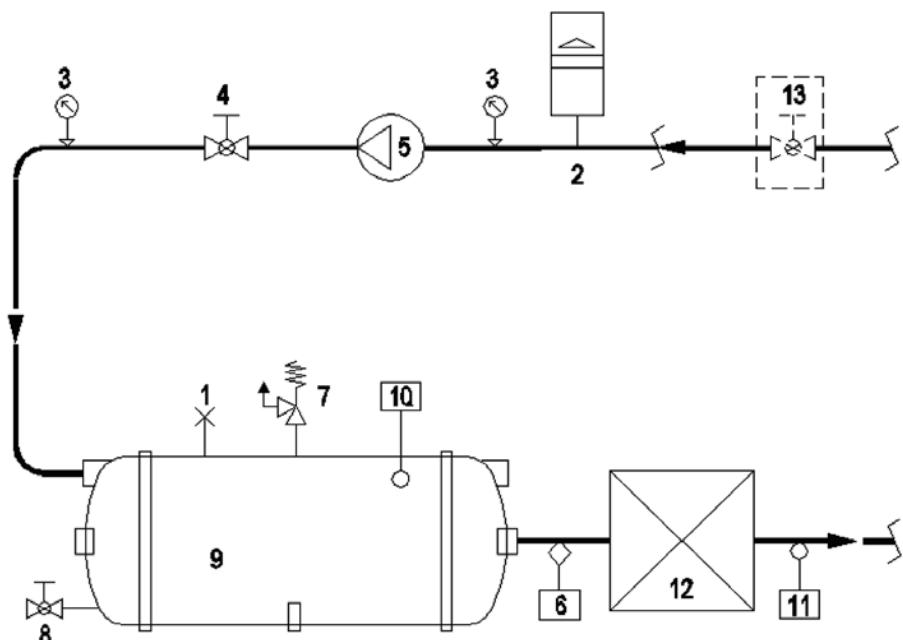

## Refrigerant Circuit MCAEY....H

- 1 = Compressor
- 2 = Outdoor exchanger
- 3 = Indoor exchanger
- 4 = Fan
- 5 = Expansion valve
- 6 = Dryer
- 7 = Fan \*\*
- 8 = Suction line valve \*\*
- 9 = Liquid line cock \*\*
- 10 = Sight glass
- 11 = Schrader service valve
- 12 = Low pressure switch
- 13 = High pressure switch
- 14 = Check valve
- 15 = 4 way valve
- 16 = Suction separator \*\*
- 17 = Solenoid valve
- 18 = Liquid receiver
- 19 = Gauge \*\*
- 20 = Temperature probe
- 21 = Antifreeze probe
- 22 = Supply cock \*\*
- 23 = Relief valve

\*\* The outlined components are optionals

## Hydraulic Circuit MCAEY....PAC 1

- 1 = Bleed valve
- 2 = Exp. vessel
- 3 = Gauge
- 4 = Setting valve
- 5 = Water pump
- 6 = Flow switch
- 7 = Relief valve
- 8 = Drain/fill up valve
- 9 = Water tank
- 10 = Temperature probe
- 11 = Antifreeze probe
- 12 = Evaporator
- 13 = Shut off valve \*\*

\*\* The outlined components are optional

### • PAC 1: n° 1 off pump

	Operative range		Cooling	Heating
	Inlet Water Temp. Evaporator	Outlet Water Temp. Evaporator		
INLET WATER TEMP. EVAPORATOR	Max °C		17	45
	Min °C		9	30
OUTLET WATER TEMP. EVAPORATOR	Max °C		10	50
	Min °C		5	35
EXTERNAL AIR TEMPERATURE	Max °C		46	20
	Min °C		15 (1)	-5

(1) This value can go down to -15 °C only if the appropriate kit has been installed

### CORRECTION FACTORS

Ethylene glycol percentage by weight (%)	10	20	30	40	50
